

# UX Testing + UI Iteration

		<b>User Interface:</b> How could the styling of elements be changed to make a more visually appealing, clear, and space efficient layout? (ex: sizes, colors, fonts, alignment, etc.)	<b>User Experience:</b> What elements of the user experience could be improved to make the page more intuitive and more fun/satisfying? (ex: sounds, hover effects, press effects, etc.)
<b>User 1 Name:</b> Nate	<ul style="list-style-type: none"><li>resize the images so that they fit the divs better without stretching</li><li>the drop shadow reaches outside of the white container so fix that to make it look more professional</li></ul>	<ul style="list-style-type: none"><li>Hover effect is too minimal make a more obvious change</li><li>the sounds overlap maybe fix that</li><li>•</li></ul>	
<b>User 2 Name:</b> Aidan	<ul style="list-style-type: none"><li>make the top right picture fit the div better</li><li>make the browser fit and not touch the boarder</li><li>•</li></ul>	<ul style="list-style-type: none"><li>Add a reset button</li><li>finish code and add honors requirement</li><li>•</li></ul>	
<b>User 3 Name:</b> Julien	<ul style="list-style-type: none"><li>transparent doesn't look good - have them just look the same after clicking</li><li>Bottom of the page is a little packed - space them out better</li><li>•</li></ul>	<ul style="list-style-type: none"><li>Make the slap button reset everything</li><li>finish code</li><li>make the pictures rotate when hovering over</li></ul>	
<b>User 4 Name:</b> Windgrove	<ul style="list-style-type: none"><li>Fix the images - they are stretched</li><li>the bottom picture gets cut off (that's intentional)</li></ul>	<ul style="list-style-type: none"><li>The avatar audio is too long - trim it because it's repetitive</li><li>There is a pause before the video switches - maybe make it a smoother transition</li><li>•</li></ul>	
<b>User 5 Name:</b> Mmasi	<ul style="list-style-type: none"><li>the neon blue drop shadow is a little out of place- make it a more fitting color</li><li>maybe round the container corners like the images</li></ul>	<ul style="list-style-type: none"><li>All the audio is good but maybe cut down the avatar audio</li><li>•</li><li>•</li></ul>	

## UI Before Feedback (Screenshot / GIF)

```
12 /* build your layout
13 .outside {
14   height: 100%;
15   width: 45.1%;
16 }
17 .outside2 {
18   height: 100%;
19   width: 49.9%;
20 }
21 .container {
22   height: 95%;
23   width: 100%;
24   display: block;
25 }
26 .slap {
27   height: 10%;
28   width: 100%;
29   display: block;
30 }
31 .top-row {
32   height: 55%;
33   width: 100%;
34   display: flex;
```

```
12 /* build your layout
13 .outside {
14   height: 100%;
15   width: 45.1%;
16 }
17 .outside2 {
18   height: 100%;
19   width: 49.9%;
20 }
21 .container {
22   height: 95%;
23   width: 100%;
24   display: block;
25 }
26 .slap {
27   height: 10%;
28   width: 100%;
29   display: block;
30 }
31 .top-row {
32   height: 55%;
33   width: 100%;
34   display: flex;
```

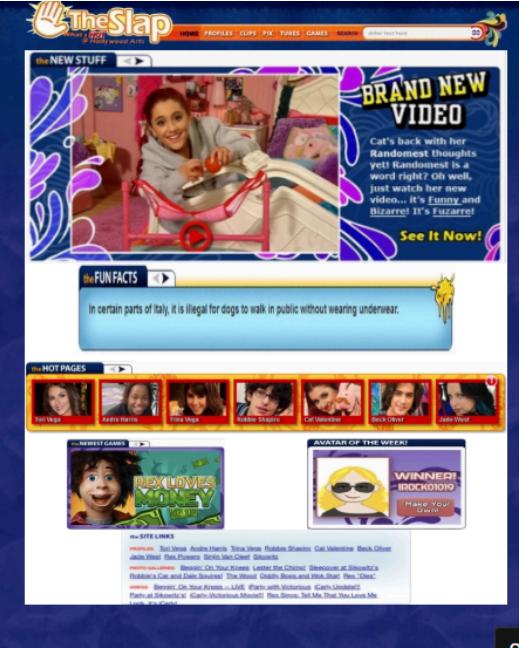

```
function swapBound() {
chat place holder
[ ]
```

## UI After Feedback (Screenshot / GIF)

## What trends did you identify in your feedback?

- Lots feedback on the stretching of the images
- Fixing the images to fit better in the divs
- Switch up the arrangement
- Things not fitting well
- Make a reset button
- Finish code

## What changes did you make to improve your UI?

```
function playSlap() {
  document.getElementById("slap-oh").play();

  img.style.display = "block";
  video.style.display = "none";
  video.pause();
  audio.pause();
  img.classList.remove("translucent");

  italy.classList.remove("translucent");
  siko.classList.remove("translucent");
  pages.classList.remove("translucent");
  make.classList.remove("translucent");
  love.classList.remove("translucent");
  avatar.classList.remove("translucent");
  wood.classList.remove("translucent");
  link.classList.remove("translucent");
}
```

```
// this will make all images fit better
img {
  max-height: 100%;
  max-width: 100%;
```

```
function swapBound() {
  if (img.style.display !== "none") {
    img.style.display = "none";
    video.style.display = "block";
    video.play();
    audio.play();
  } else {
    img.style.display = "block";
    video.style.display = "none";
    video.pause();
    audio.pause();
    img.classList.add("translucent");
  }
}
```

- I fixed the max-size of the images
- I made a reset button (the slap browser)
- I fixed the container so that it fits on the screen and the images fit better was well
- I also trimmed the audio from 15 seconds to 8 seconds
- I also changed my code for the swapbound to work correctly with my own code
-
